

When to Stay Home

Any student or faculty / staff member with a fever of 100.0 degrees Fahrenheit or higher and/or symptoms of possible COVID-19 virus infection should not be present in school. The following are listed as the most common symptoms of COVID-19:

- Temperature greater than 100.0 degrees Fahrenheit or greater
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or Body aches
- Headache
- New loss of smell or taste
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

In addition to the above list of symptoms:

- Any student or faculty/staff member who knowingly has been in close or proximate contact in the past 14 days with anyone who has tested positive through a diagnostic test for COVID-19 or who has symptoms of COVID-19
- Any student or faculty/staff member who tested positive through a diagnostic test for COVID-19 in the past 14 days
- Any student or faculty/staff member who has experienced any symptoms of COVID-19, including a temperature of greater than 100.0 degrees Fahrenheit in the past 14 days
- Any student or staff member who has traveled internationally or from a state with widespread community transmission of COVID-19

Any student or faculty/staff member exhibiting COVID -19 symptoms will need to stay home and self-quarantine, monitor their symptoms for signs of worsening and contact their primary care physician.

Any student or faculty /staff member who has come in contact with someone who has tested positive will need to stay home, self-quarantine, monitor for signs and symptoms and stay in communication following any guidelines with their county's DOH

Any student or faculty/staff member who has traveled internationally from a state with widespread community transmission of COVID-19 will need to follow the NYS guidelines to self-quarantine.

To return to school please refer to the When to Return to School Policy.
